

SHAPE TOMORROW

SILA is a new residential concept rooted in the innovative, sustainable vision of Masdar City in Abu Dhabi. Designed as a community that lives in harmony with its surroundings, SILA embraces thoughtful architecture, clean energy, and a lifestyle shaped with tomorrow in mind. Masdar City's commitment to low-carbon living, walkability, and smart urban planning forms the foundation for SILA's design approach.

Here, homes, landscapes, and public spaces are crafted to feel connected — to nature, to community, and to purpose. SILA represents a new way of living: modern, mindful, and grounded in the belief that shaping a better future begins today.
